EmbroideryWorks - Home to the best embroidery software tools

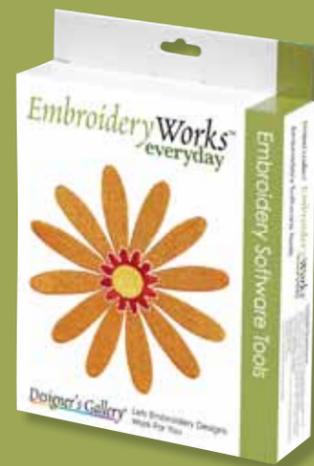

The most popular features in embroidery software have finally come together in EmbroideryWorks. To accommodate embroiderers of all skill levels, there are two versions of the software: **Everyday** and **Advanced**. Key tools for editing, lettering and density adjustment are found in both versions, but there are also additional, premium features exclusive to the Advanced version.

EmbroideryWorks Everyday comes with all of the software tools you use daily. If you're a more experienced embroiderer looking to fine-tune designs, then EmbroideryWorks Advanced is the version for you.

Key Features found in EmbroideryWorks Everyday & Advanced

EmbroideryWorks Everyday provides embroiderers with a toolbox filled with all of the essential design editing functions needed to create beautiful embroidery in one convenient place.

Sizing:

- Resize designs to 50% or 250% of original design
- Stitches automatically change from satin stitch to satin fill stitch as needed to avoid gaps in finished project

Density Map & The Sweep:

- Review density on the density map before embroidering
- Automatically find and remove hidden stitches - great for overlapped designs
- In EmbroideryWorks Advanced you can manually adjust and fine-tune density to your liking

Merge:

- Combine multiple designs for a completely unique creation
- Merge designs and fonts for completely original monograms or lettering

Fonts:

- Personalize every project with built-in lettering styles
- Create an original appliqué design with inspirational appliqué frames

Circle/Spiral Text:

- Use circle text to create a circular design, fit lettering around designs
- As the circle size is decreased, text spirals in on itself to create a swirling effect

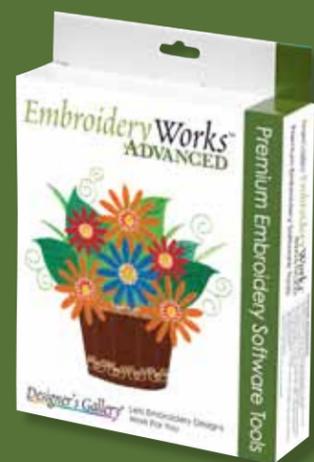

Text Enveloping:

- Arrange text to fit around pre-set shapes

Premium Features in EmbroideryWorks Advanced

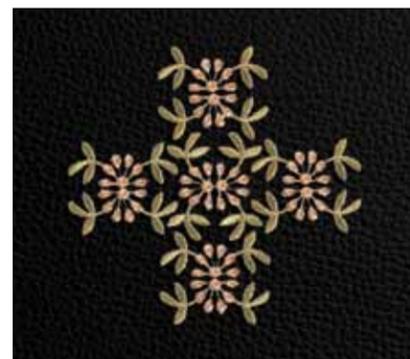

EmbroideryWorks Advanced gives experienced embroiderers the necessary tools for precise customization of embroidery designs. Easy-to-use, automatic editing features combined with user-friendly, additional options make this software the perfect choice for fine-tuning embroidery designs.

Instant Repeat:

- Quickly and easily repeat designs in a uniform pattern of perfect rows and/or columns
- Select number of designs across and down for a unique tiling effect

StitchPerfect:

- Automatically adjust stitches based on fabric choice
- Move, insert or delete stitches to fine-tune designs

Font Importer:

- Expand your font library for even more creative lettering solutions
- Quickly import lettering files and use them as built-in fonts.

Precise Position:

- Easily place designs in specified areas of the workspace
