Pro-Stitcher® 6

Premium Computerized Quilting Software System

Achieve show-level precision and quality with Baby Lock's Pro-Stitcher Quilting Software. No extra PC is required – Pro-Stitcher's included tablet becomes your control center! Pro-Stitcher comes equipped with everything you need to quickly make the switch.

Next Level Quilting at Your Fingertips

Touchscreen Tablet Control

The Pro-Stitcher system operates from a single 12" (30mm) color touchscreen tablet that mounts onto a stitch-regulated quilting machine, giving you full, real-time control over every inch of your design work. (*Regalia, Coronet and Crown Jewel models)

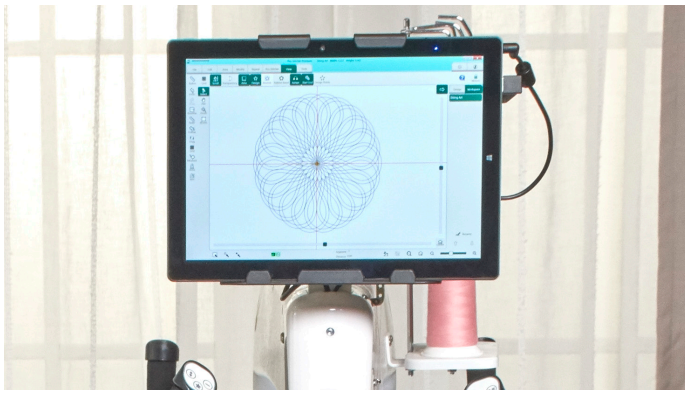

Carriage/Flexirack System

The Carriage/Flexirack System is easy to install and allows motors to disengage for free-motion quilting.

Over 900 Built-in Designs and Motifs

You'll aways have something to stitch, thanks to Pro-Stitcher's huge selection of built-in designs. Even better, it includes an extensive showcase of motifs from your favorite designers.

Easily Edit Designs

Pro-Stitcher's designs can be modified to match your vision for your quilt. Make all the necessary adjustments right on the screen with your finger or stylus.
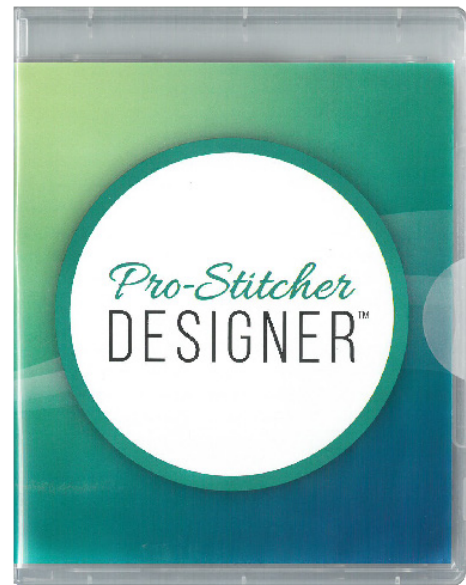

Endless Customization Options

Create quilt designs with various customization options. Choose your borders, stitches, start and stop points, alignment and more — the quilt of your dreams is possible down to the last stitch.

Create Unique Pantograph Designs

Got an idea for a one-of-a-kind pantograph? You're in luck! Pro-Stitcher allows you to wrap and stagger designs in a continuous pattern for an unforgettable finish.

Full-featured, vector-based editing and digitizing software

Easy-to-learn user interface and features

Free lifetime program updates

Convert True Type fonts to artwork

Multi-Point Shapes

Merge, duplicate, crop and fit designs to create the most elaborate shapes possible. You're only limited by your imagination.

Pro-Stitcher Designer Software

(Optional on previous versions, included with Pro-Stitcher 6 versions BLPS6 and BLSP6-RG)

This special add-on software works with Pro-Stitcher and gives you a suite of tools to create vector-based digital art and stitch files for all your quilting projects.

Features and Specifications

Pro-Stitcher Features

- Carriage/Flexirack System
- 12" (30mm) color touchscreen computer mounts onto a stitch-regulated quilting machine
- Entire system operates from a single screen
- Includes more than 900 designs, including an extensive showcase of motifs from your favorite designers
- Switch between computer-guided and free-motion quilting at the touch of a button
- Resize, rotate and repeat designs to fit specific areas
- Skew or align designs to fit any area with three or more points
- Move designs into position by simply moving your finger across the screen
- Stretch and resize a design using onscreen handles
- Define and fill an area with a design, using two-corner (rectangles) or multi-point (any shape) tools
- Save and move areas
- Two-point rotation for border designs and fitting odd angles
- Precisely reposition designs using the center point, start point, end point, any corner of the design area or any point within the design
- Crop inside or outside of your area to fit your quilt, with the option to close the jumps or leave them open
- Create new start and end points anywhere along a design path, including every 1/100th of an inch (.25mm), at design points, and at jump points.
- Customizable speed and stitches-per-inch
- Micro tie-off or tack function
- Seamless integration with Pro-Stitcher Designer™ for designing and adjusting your own patterns at the longarm machine or on your computer
- Mark and record multiple points for accurate stitch-in-the-ditch quilting
- Onscreen grid and ruler to measure designs or area on quilt
- Reorder designs for stitching
- Horizontal and vertical channel lock
- Help menus
- Set Quilting Space on the workspace to represent the quilting space available
- Display Stitch Stats under the Settings tab to check the number of stitches, the amount of time, and the amount of thread it will take to stitch out a selected design
- Baste popup warning appears when Baste is activated and Run is selected
- Snap to grid option for Mark and Area tools
- Set quilt designs to load at Crosshairs or Load Point to Point

Easy-To-Use Quilting Options

- Quilt edge-to-edge or block patterns with confidence in a few simple steps
- Simple and accurate stitch-in-the-ditch
- EZ Record: record unique digital designs for future use (newly created designs can be saved on a USB or the Pro-Stitcher hard drive to be resized, repositioned or edited)
- Built-in ruler tool for measuring in any direction

Advanced Technology

- Silent, integrated motor-control systems with fluid motion control
- No additional computer needed to run the Pro-Stitcher
- Separate PC connected to the internet is required for downloading new designs and software updates
- USB port to easily upload digital patterns

Pro-Stitcher Designer Features

- Full-featured, vector-based editing and digitizing software to create your own digital quilting files
- Easy-to-learn user interface and features
- Free lifetime program updates
- Full user support with manual, tutorials, and videos
- Design and stitch motif library
- Print design catalog
- Compatible with all major longarm quilting file formats
- Import and export vector formats
- Batch save in all quilting formats
- Draw original designs with pencil, line, curve, three-point arc and bezier tools
- Customize, edit and merge existing designs
- Use design points and anchors for fine-tuned customization
- Create quilt designs from artwork using trace tools
- Audition quilt patterns and preview with slow redraw
- Use autoshapes to quickly draw original quilt patterns
- Create repeated motifs with the carousel and reflect features
- Convert True Type fonts to artwork
- Add seam allowances to appliqué
- Customizable grids, including diagonal grid
- Print pantographs and tear-away stencils for use with home sewing machines and non-robotic longarm quilting machines
- Quickly preview how designs repeat while drawing
- Repeat designs to create edge-to-edge layouts
- Fill shapes with cross-hatching, wave fills, stippling and more
- Use fills around a design
- Turn shapes into appliqué designs with a mouse click
